INTERVIEW PROJECT REQUIREMENTS	FAILS TO MEET	PARTIALLY MEETS	MEETS	COMMENTS
1) The interviewer developed 10 additional interesting and insightful questions of his/her choice in addition to the 10 required by Mr. Matuch for a total of at least 20 questions . (The required questions can be found at matuchdc.com) The interviewer avoided simple yes/no or repetitive questions. Questions were well balanced. (15 points)				
2) The interviewer made sure that the interviewee and Mr. Matuch were given the list of 20 questions prior to the scheduled interview day. (At least 24 hours before the interview so that the person can think about their answers.) (5 points)				
3) On the day of the scheduled interview, the interviewer was prepared with the questions -already printed at the start of class (no delays) (5 pts)				
5) Audio - external mic was used and the interviewee answers can clearly be heard. (5 points)				
6) Interview location is free of distracting background "noise" and/or visuals. *If Greenscreen was chosen, it has been replaced. (5 points)				

<p>7) Interview is framed using the “over the shoulder” technique as discussed and demonstrated in class. The interviewee is framed correctly (chest level to top of head- filling the frame with “nose room” - not directly centered) (5 points)</p>				
<p>8) The interview was effectively edited down from the original longer interview down to an interesting and well balanced 5 minute final product. This is the heart of the project and the editing process. (What goes? What stays?) (20 points)</p>				
<p>9) Question text titles, credits, are added to the project in between answers. Titles are on long enough to read comfortably (not too short/not too long!) Font choice and size is appropriate and can be easily read against a contrasting solid background (black usually works best). (15 points)</p>				
<p>10) All directions for creating, exporting, naming and submitting the project file in google classroom were carefully followed and completed. (3 points)</p>				
<p>11) At least 3 cut-away shots (pictures or video) were correctly added to enhance and add visual interest to the interview. Adding cutaway shots with the actual person in it scores higher. (12)</p>				
<p>12) A subtle non-distracting instrumental song was added to the background with audio levels properly adjusted or “ducked” (volume is louder during the question title and lowered when the person is answering) (10 points)</p>
